

Magnaflex[™] System First and Second Hand Smoke

Magnaflex[™] System with Activated Carbon Filter offers a Solution to First and Second hand Smoke!

Helps filter and trap:

- Lingerin g smoke fumes
- Carcinogenic substances in smoke
- Odors
- Smoke before re-circulating to other areas

Know the facts.

For decades the Surgeon General has issued a warning about the detrimental effects of smoking. Smoking related disorders include: lung disease and cancer, COPD, emphysema, asthma and chronic bronchitis. "Smoke contains more than 4,000 chemical compounds, of which 250 are toxic and more than 50 are known cancer-causing agents." Now even more is known about second-hand smoke. "Non-smokers who live with a smoker have a 20% to 30% increased risk for developing lung cancer, heart disease, eye and nasal irritation, and increased risk of sinus and respiratory infections."

The Airspace Filtration™ companies are committed to delivering innovative products and solutions which promote premium indoor air quality. By taking an active and preventative approach these products elevate and promote cleaner indoor air quality standards, conditions, and environments.

Exposure Time to Secondhand Smoke and Effects:

5 minutes – stiffens the aorta as much as smoking a cigarette

20-30 minutes – causes excess blood clotting, as well as increases the build up of fat deposits in blood vessels, increasing the risk of heart attack and stroke

2 hours – increases the chance of irregular heart beat (arrhythmia) and can trigger a fatal cardiac event or heart attack

The Magnaflex™ System with Charcoal Filter is an ideal solution for reducing the re-circulation of smoke and smoke odors throughout your home/office.

**Typically, a building will recirculate air 5-7 times per day*

Magnaflex™ System

Magnaflex™ System

The Magnaflex™ System couldn't be easier to install and takes mere seconds. The system consists of two components, a gasket bottom layer and a honeycomb top layer which are laminated together. They are made from a light-weight high density closed cell polyethylene with a laminated magnetic vinyl on the bottom of the gasket. Simply select a filter of choice and place into the back opening (like using a picture frame), position on your vent grille and strong magnets will hold the Magnaflex™ System in place until you decide it's time to change out the filter.

Activated Carbon Filter

Magnaflex™ Vent Duster System with an Activated Carbon Filter will help to trap and absorb airborne pollutants. An activated carbon filters (ACF) is one of the most naturally porous structures known—one cubic foot provides approximately 200 million square feet of surface area! This gives a tremendous absorptive capacity and allows it to function as an extremely efficient net which snares and traps odors, gases and impurities within its vast network of microscopic channels.

Save time, money and materials.

100% perfect fit, each and every time. Available in every vent grille size.

No tools required, simply place on vent grille. The magnetic frame will stay in place until removed or repositioned. Easy as 1-2-3!

Select our Environmentally Friendly "Green" recycled/reusable filter

Parts 100% manufactured in the USA
Some parts ISO 9001:2008 certified manufacturer
