

Pre-Vent[™] Shield Disposable Filters Indoor Toxic Fumes Kit.

**When you smell fumes, you are smelling the
release of toxic chemical molecules**

Ideal uses:

- **Construction**
- **Redecorating**
- **Remodeling**
- **New Product Out-Gassing**

Know the facts.

Plywood, pressed wood, particle board and medium density fiberboard, which are used in most furniture today, are generally treated with formaldehyde, a suspected carcinogen, and can emit fumes for as long as five years.

The Airspace Filtration™ companies are committed to delivering innovative products and solutions which promote premium indoor air quality. By taking an active and preventative approach these products elevate and promote cleaner indoor air quality standards, conditions, and environments.

“In the past, it was difficult to select an economical and efficient filter that would meet clean air requirements and be suitable to a particular location. Now it’s easy to choose - the Airspace Filtration System leads to exceptional air quality and is less costly than any other system currently on the market.”

Pre-Vent™ Shield Toxic Fume Shield Kit offers a simple, economical and immediate vent and HVAC filtration solution.

Pre-Vent Shield™ Toxic Fume Kit

Pre-Vent™ Shield Disposable

Activated Carbon Filter

An activated carbon filter (ACF) is one of the most naturally porous structures known—one cubic foot provides approximately 200 million square feet of surface area! This gives it a tremendous absorptive capacity and allows it to function as an extremely efficient net which snares and traps odors, gases and impurities within its vast network of microscopic channels.

Using the activated carbon filters (ACF) with our Pre-Vent™ Shield Disposable or our Magnaflex™ System on your “air return vents” assists in absorbing and reducing these unwanted environmental toxic fumes and odors.

Ideal uses:

- **New Homes/Buildings**
- **New Additions/Remodeling**
- **New Carpeting, Mattresses, Furniture & Upholstery**
- **New Building materials, Flooring**
- **Strong Cleaning Product Odor**
- **Anywhere where toxic fumes are produced**

Save time, money and materials.

100% perfect fit, each and every time. Available in every vent grille size.

No tools required, simply peel off back and position or easily re-position.

Eliminates filter cutting, taping, trimming, and wasting expensive materials.

Parts 100% manufactured in the USA
Some parts ISO 9001:2008 certified manufacturer
